WASH-BASIN
A central open hole is present. Two diaphragm side holes can be opened upon request. The wash-basin is therefore suitable for the installation of both single hole tap or and three-hole taps.

BIDET
Single-hole bidet with water delivery from the tap fitting. Diaphragm side holes enabling the installation of three-hole taps. Version with and without shower.

CLOSET W.C.
Type S = floor flush • Type P = wall flush
Cistern with cover complete with universal flush assembly with water delivery from below discharging from six to nine liter water. Toilet seat with wooden core and polyester resin coating, closet (WC) finishing in the same line.

10. Fine Fire Clay
The Suez Special Economic Zone is one of the largest and most important development projects being undertaken in Egypt, and Group Cleopatra is playing a key role in developing the site to the highest international standards to attract inward investment and encourage export-oriented development.

**THE COMPANY**

In Suez Special Economic Zone Ceramica Cleopatra is establishing two gigantic factories for Sanitary ware and Ceramic products. Using state-of-the-art technology highly sophisticated machines and equipment are now being constructed in both factories. Sanitary ware factory that covers nearly 30,000 m². Its capacity, is 0.5 Million pieces, to be increased to 1 million pieces by the end of the year. Ceramic factory that covers nearly 40,000 m², will produce 10 million m² year.

ACRYLICH BATH-TUB

EASY TO INSTALL
The installation of Cleopatra’s hydromassage baths does not present any difficulty and, if it were not for the electric system, you could compare the operation to the installation of a traditional bath. The water system is the one in common use, while the self-supporting structure of the bath requires no particular preparation, allowing for a quick assembling of the sides, solving any paneling problem.

EASY TO USE
Cleopatra’s hydromassage baths are as simple to use as they are to install. Pushing a key on the edge of the bath activates the hydromassage, turning the taps regulates the amount of air while the intensity of the jet is selected by rotating the ring inside the plate. All the attention taken, while apparently simple, are the result of a continuous research and technological application which make Cleopatra’s hydromassage baths an unique product of its genre.

Analysing in detail the range of Cleopatra’s hydromassage baths, another important characteristic is their strength, due to the special material used, the casted acrylic sheets, known under the trade name of perspex reinforced by several layers of high quality resin.

The structures of both panelled and hydromassage baths are made with solutions unique in the field, a self-supporting frame made in hot galvanised stell, the fixing of the panels resulting very strong, easy to assemble and dismantile. The high resistance guarantees unalterated and durable quality of the baths.

When in use, comfort and silence are assured by a specially planned system as well as the suction base, highlighting the measure of care taken in the projectual work. Hygiene conditions are guaranteed by an efficient drain system which completely eliminates any water residual in the system after the bath has been used.

Finally, 8 or 8 orientable jets and the optimal mix of air-water flow, ensured by the highest quality plumbing system, allows for the maximum physical benefit from the hydromassage practice. Before delivery every single hydromassage bath is subjected to a severe program of control and testing to ensure maximum respect of all quality and security norms.

Subsequently, the system is equipped with sophisticated safety devices that stop the bath functioning in case the suction is obstructed or the water level is insufficient.

The keys are cast in chromed or golden brass instead of plastic, allowing ease of cleaning and durability.

Maintenance is extremely easy: a few elementary rules will ensure unaltered beauty of your bath for years to come.

CLEANING
It is recommended cleaning is done using liquid detergents with a sponge or a soft cloth. The following substances are to be avoided: alcohol and alcohol based detergents, polish remover and any solvent. For scratches and burns, no fear! The high quality of metacrylate allows the restoration of the surface to its previous condition.

DISINFECTION
Absolute hygiene is guaranteed by a disinfecting cycle in the bath and in all the plumbing circuit.

FITNESS
Never before has there been such a sense of awareness of the importance of personal hygiene, beauty and fitness, and the benefit of an inner well-being at the same time. Feeling better with ourselves helps our relationship with others. Our relation with nature is changing as well, we are more respectful and more inclined to carefully choose natural methods to take care of ourselves.

The development of hydromassage technology is inserted in this contest: combining two natural elements such as air and water, and two physical-mechanical functions such as pressure and movement result in hydromassage practice, with its infinite possibilities of application in therapy and beauty methods. These practices are no longer the domain of specialised or thermal centres, now everyone of us can create his own ‘island of well-being’ at home, where Cleopatra’s hydromassage bath occupies a relevant position.

To immerse in it, leaving the mix of water and air bubbles to act on your body is the best way to reach your ‘well-being island’ and to forget the daily stress.

HEALTH ADVANTAGES OF THE HYDROMASSAGE

CIRCULATION
Hydromassage stimulates blood circulation and helps in the prevention of varicose veins.

ARTHROSI’S
Hydromassage practice is indicated to relieve pain due to articulation rigidity and muscular contractions.

TRAUMATOLOGY
Both orthopedic and traumatologic treatments recommend water massage to aid recovery from traumactic accidents and for bone, muscle and ligament suffering.

STRESS
Hydromassage reduces anxiety and stress, thanks to muscle and nervous system relaxation due to the flow of air and water.

FITNESS AND BEAUTY ADVANTAGES OF HYDROMASSAGE

CELLULITIS
Hydromassage practice offers a valid contribution in fighting obesity and cellulitis; in these cases it is recommended to intensify the jet of air and to direct it on those body areas to be treated with the massage.

TONIFICATION
Those who practice sports will relieve tiredness and physical exhaustion by relaxing and tonifying all body muscles.

SUGGESTIONS AND CONTRA-INDICATIONS
Hydromassage should always take place after digestion, the water temperature be regulated at around 37 degrees Celsius and the practice should last 15 minutes. Natural substances like sea salts and bath oils can be diluted in the water to increase the benefits of the massage.

People suffering from hypertension and cardioathic conditions should abstain from taking hydromassage. In all cases too hot a temperature is to be avoided.

Group Ceramica Cleopatra obtains ISO 9001 certification for its quality system.

Group Ceramica Cleopatra has been awarded certification by Certichim, an institute approved for quality certification for the chemicals and ceramics industries. ISO 9001 is the jewel in the crown of a ceramics company which has always dedicated the greatest attention to all design, product development, production, sales and service activities.

Group Ceramica Cleopatra, leader in the Egyptian ceramics sector, has been investing in technological and aesthetic research for a long time, achieving strong growth while consolidating its image.

Group Ceramica Cleopatra produces:
- Ceramic wall tiles (white and red body)
- Ceramic floor tiles, white body (heavy duty tiles)
- Porcelain, granite tiles
- Sanitary ware (vitreous china and fine fire clay)
- Decorated tiles
- Decorated sanitary ware
- Acrylic bath tubs and hydromassage tubs

Group Ceramica Cleopatra is a trademark that means quality.
